We are constantly expanding interWaysMAIL, because we want to be your leading source for cutting-edge mail and calendaring applications.

We have added these new features recently:

- Support for Outlook 2016 and Windows 10.
- Support for Outlook on the Apple Mac (EWS) for Mail, Calendars, Contacts sync directly within Outlook 2016 for the Mac. Please contact us if you want to add this feature to your account.
- S/MIME encryption for Emails
- Offline-Mode for the webmail app. In the top right corner you will find the Offline-Mode when using Chrome or Firefox. This will enable you to use mail and calendaring features with data from the last 30 days, even without internet connection.
- Improved interface
- Shared 'Sent' folder when using shared mailboxes
- ... and so much more. Visit here often for more news...
